### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On p 1 of the Specification below the title, please enter

--This application is a 371 of PCT/US03/04729, filed 02/19/2003 which claims the benefit of U.S. Provisional Application No. 60/366,593, filed 03,21,2002.--

The following is an examiner's statement of reasons for allowance: The claimed formula for calculating the centrifuge retention capacity (CRC) is derived from Applicants own experimental work. Prior art teaches centrifuge retention capacity (CRC) as a known design parameter for absorbent structures comprising SAPs; however, the parameter has previously been determined by direct experimental measurement using methods such as the teabag retention test detailed in Bewick-Sonntag et al. Designing an absorbent composition using a generalized correlation for calculating the CRC value based on specified parameters of porous quality and SAP mass fraction, then calculating the amount of SAP and stranding material needed to form the absorbent structure is a non-obvious change over the prior methods.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1731

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
